Date

Conditions of Lifetime Retention Guarantee:

1. Minimum application number is 100 Breeder (white) NLIS Tough Tags on one PIC. 2. Datamars Large, Medium or XL Matching Management tag printed with the same code and numbering as the NLIS Tough Tag and a male button printed LIFETIME GUARANTEE must be applied in the same or opposite ear with its corresponding NLIS Tough Tag. 3. A Guarantee Registration Form must be returned by Fax or Post to Datamars within 2 weeks of tagging verifying application position, applicator used and the type and batch number of the antiseptic solution used. Datamars verifies the registration within 7 days of receipt. The Guarantee becomes effective upon the date of that receipt. 4. To claim on losses, a Datamars claim form (supplied upon request) is to be returned with the visual numbers of animals with missing tags (in digital spreadsheet format) along with supporting photos of animals with Matching Management tags and no NLIS tag. New replacement NLIS tags will be supplied and original "missing tags" will be removed from the NLIS database as "dead". 5. Only the original purchaser who submits the Guarantee Registration Form can claim on NLIS Tough Tag losses. Tagged cattle must still be on the original PIC and must remain on that PIC for life to claim. Datamars reserves the right to inspect cattle prior to supplying replacement tags or ask for additional supporting evidence. White (Breeder) NLIS tags will be sent out at no charge when the claim is processed. 6. Datamars 'application of electronic eartag' directions (from tag packet) to be followed.
